

Supported Wireless Devices for My Keypad

Device Required Services

- Data enabled (can connect to the Internet)
- Java enabled
- SMS enabled, with support for Short Codes

Notes:

1. To determine if your device is SMS enabled with support for Short Codes, text the word HELP to 25276. You should receive a reply regarding Total Connect services. If no reply is received or you are unsure of what services your plan provides, please contact your wireless carrier for assistance.
2. By using these required services you may incur additional charges based on your service plan. Please contact your wireless carrier for details.

Device Support

Since there is no uniform standard that wireless devices adhere to, we cannot ensure compatibility with every wireless device. However, wireless devices that meet the required services (at left) may work with the "My Keypad" application.

The "My Keypad" application has been tested with the latest popular BlackBerry® devices and cell phones.

When you log into the *Total Connect* website to configure your mobile device, you will be offered various device support choices. The selection you choose will determine which "My Keypad" application will be sent to your wireless device.

If the "My Keypad" installation fails, then log back into the *Total Connect* website and choose a different support choice for your device.

Note: BlackBerry Enterprise (Corporate) devices may not work with either version due to corporate IT policies that restrict downloading applications or providing the services required to initiate and complete the "My Keypad" installation.

Please refer to the appropriate quick start guides, *My Keypad for BlackBerry* or *My Keypad for Cell Phones*, available online, for details on setting up your device.

Honeywell

MY KEYPAD PHONE COMPATIBILITY LIST
