

TouchCenter Graphic Voice Keypad Family

STATE-OF-THE-ART DIGITAL TOUCHSCREEN KEYPAD,
DIGITAL PICTURE FRAME AND COMMUNICATIONS TOOL

**Picture the Possibilities
For Your Business!**

Honeywell

Picture the Possibilities

Sleek, smart and state-of-the-art, Honeywell's TouchCenter functions as a keypad and digital picture frame in one.

It features a stunning, high-resolution 640 x 480 TFT display that makes security system operation crystal clear and is a dynamic communications tool—letting you showcase products in vivid detail, advertise sales and special promotions, post employee announcements, floor plans and more. You can even display system status in a choice of six languages. It's truly the picture-perfect security solution!

Dynamic Communications Tool

- Showcase merchandise, increase product awareness, advertise sales and special promotions
- Post employee announcements and notifications
- Display photos of facility and staff, hours of operation, floor plans and visitor information
- Create slideshows with a simple press on the touchscreen and upload imagery with the same SD card from your digital camera

We Speak Your Language

TouchCenter can display system status in six languages—English, European Spanish, Latin American Spanish, French Canadian, Italian or Portuguese. This is great for multilingual facilities or where non-English speaking employees or workers may be using the system. The voice annunciation option announces the type and location of an alarm to help occupants act quickly in the event of an emergency.*

Sleek, Stylish Design

A choice of three cutting-edge colors—silver, black or white—match a number of business environments, including retail stores, offices, lobbies, conference rooms, commercial kitchens, warehouses, industrial settings and more.

State-of-the-Art Security

Whether arming or disarming the system, accessing the event log, bypassing zones or controlling lights and garage doors, TouchCenter's menu-driven prompts reduce employee training time and make operation crystal clear.

Picture the Possibilities

TouchCenter's digital picture frame and brilliant, intuitive touchscreen keypad are an unbeatable combination—letting you add state-of-the-art security to your facility, increase product awareness, enhance employee communication and much, much more. Just picture what it can do for your business! Ask your security professional for details today.

*Voice annunciation option available in English language only.
