

6272CV

COLOR GRAPHIC VOICE TOUCHSCREEN KEYPAD FAMILY

Honeywell's 6272CV Color Graphic Voice Touchscreen Keypads family features a high-resolution TFT display that doubles as a digital picture frame. There is a choice of silver, black and white color schemes, six language options and voice annunciation of alarm conditions – giving you the opportunity to close more sales, increase retention and capture new markets.*

The digital picture frame feature adds value to commercial systems by allowing businesses to display special promotions, sales or floor plans, give employees specific information about day to day activities, increase their brand exposure by showcasing their company logo or business and much more.

The choice of three color housings and six languages (ideal for businesses with multilingual employees) opens up new opportunities and markets that previously were untapped. Silver blends perfectly in stainless steel restaurant kitchens, garages, warehouses and many other industrial settings. Black is ideal for conference rooms or positioning near flat screen media displays. White, a popular classic choice, blends seamlessly with lighter décors such as a doctor's office or front lobby.

*Voice annunciation option in English only.

FEATURES

- High-resolution 640 x 480 TFT display

COLOR GRAPHIC VOICE TOUCHSCREEN KEYPAD FAMILY

FEATURES

Event Log

TouchCenter conveniently displays the most recent actions involving system use.

A press on the touchscreen is all it takes to access the event log, letting users easily:

- View when the system was used and who used it
- Track when workers and employees use the system
- Utilize TouchCenter as an effective business management tool (e.g., viewing openings and closings)

Keypad

- Emulation of standard 2 x 16 alpha LCD keypad display
- Diagnostics allows testing of:
 - LCD display
 - Audio
 - LED indicators
